Authorization for this examiner's amendment was given in a telephone interview with Robyn Wagner on November 24 2008.

The application has been amended as follows:

Claim 1

(Currently amended) A computer-implemented method for selecting an optimal balance between direct cost and a number of suppliers comprising:

soliciting bids from a plurality of suppliers for a plurality of lots;

storing bid information from a plurality of suppliers for a plurality of lots in a database; and

upon completion of bidding for the plurality of lots:

determining using a computer a first optimal solution that includes an initial family of lot-supplier assignments; and:

if the first optimal solution has the lowest cost value:

performing multiple iterations of the following steps:

decreasing the number of suppliers in the family to

form a reduced family;

determining a revised cost value for the reduced family; and
generating a second solution having the decreased number of suppliers
if first optimal solution has the highest cost value:
performing multiple iterations of the following steps:
increasing the number of suppliers in the family to form an increased family;
determining a revised cost value for the increased family; and
generating a second solution having the increased number of suppliers

Claim 16

(Currently amended) A system for selecting an optimal balance between direct cost and a number of suppliers comprising:

a database for receiving and storing bid information from a plurality of suppliers for a plurality of lots; and

a processor in communication with the database and configured to
~~software for~~, upon completion of bidding for the plurality of lots:

~~determine~~ determining a first optimal solution that includes an initial family of lot-supplier assignments; and:

if the first optimal solution has the lowest cost value:

perform[[ing]] multiple iterations of the following steps:

decreasing the number of suppliers in the family to form a reduced family;

determining a revised cost value for the reduced family; and
generate ~~generating~~ a second solution having the decreased number of suppliers; and

if the first optimal solution has the highest cost value:

perform[[ing]] multiple iterations of the following steps:

increasing the number of suppliers in the family to form an increased family;

determining a revised cost value for the increased family;
and

generate ~~generating~~ a second solution having the increased number of suppliers.

2. Claims 1-14, 16-23 are allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance:

5. French discloses a system and method of submitting request for quotes on products and receiving quotes from service providers on the products.
6. Li discloses a system and method of determining the award schedule of service provider who have submitted quotes on products based on request for quotes.

As per claims 1, 16 and 19, the closest prior art of record taken either individually or in combination with other prior art of record fails to teach or suggest

"if the first optimal solution has the lowest cost value:

performing multiple iterations of decreasing the number of suppliers in the family to form a reduced family; and determining a revised cost value for the reduced family; and generating a second solution having the decreased number of suppliers

if first optimal solution has the highest cost value:

performing multiple iterations of increasing the number of suppliers in the family to form an increased family; and determining a revised cost value for the increased family; and generating a second solution having the increased number of suppliers

Claims 2-14 depend upon claim 1 and have all the limitations of claim 1 and are allowable for the same reason. Claims 17 and 18 depend upon claim 16 and have all the limitations of claim 16 and are allowable for the same reason.
